Alien'sCoin (AliensCoin / ALS) – cryptocurrency.

AliensCoin is a utility token, which implies its complete legality from the point of view of the world community and the SEC USA.

This is a system of electronic money, allowing you to conduct electronic transactions between participants directly, bypassing any financial institutions. Protection against hacking and DDOS network attacks works at the expense of the POS system and commissions for transactions. Transactions are sent on a least-cost basis. All coins not bought on ICO will be burnt.

To protect against spam and DDOS attacks, the creating of Indices and Tokens involves making a reserve deposit in **AliensCoin**.

Minimum deposit for creating a token: **750 ALS**

The minimum deposit for creating the index: **200 ALS**

The minimum deposit for the sale of the index: **750 ALS**

AliensCoin was invented primarily for users of AlienCloud and AlienWallet. But at the same time, we believe that it will take its place in the current crypto currency market. For this we follow our road map.

Having created the AlienCloud platform and started working with crypto-currency payments, we realized that at the moment there are currencies for which transactions take too long and commissions are extremely large (for example Bitcoin/Ethereum). To do this, we came up with the AlienNetwork protocol. Which will allow our users to conduct transactions among themselves in any cryptocurrency (available on the platform) instantly and with minimal commissions (or at all without commissions).

Bonuses for AliensCoin owners.

We plan to add a lot of bonuses for users **AlienCloud** and AlienWallet. Among the planned bonuses:

- discount for cloud mining
- the discount on the commission for exchange / trading cryptocurrency
- the discount on the purchase of real mining equipment
- bonuses in the mining pool

The issue of risk diversification for beginners.

The issue of market cryptocurrency that beginners and regular users of the market do not have the experience of self-dial with a stable and profitable portfolio cryptocurrency.

Solution.

The platform for the creation and sale of **AliensCoin** indexes will allow to use the services of professional asset managers without leaving home. In this case, the manager can not cheat them in terms of results and theft funds, because all statistics are independent and are on the platform. User's resources are on the platform and are not transferred directly to the manager.

To create an index, the manager must make a reserve deposit in **AliensCoin**. Indexes are built around the ratings: profitability, stability, the number of funds invested, popularity. To buy an index, user must depose funds in the crypto-currency at his wallet on the AlienCloud platform.

The prototype of the Index is currently working on our website www.aliencloud.xyz.

Entrance to the platform will initially be carried out through the official website: www.aliencloud.xyz

We already created desktop version **AlienWallet** . It is a wallet for Ethereum and Ethereum Classic and we integrated it with our system, in the future the main network of **AliensCoin** will be deployed on the basis of this wallet.

Link to the wallet: wallet.aliencloud.xyz

Now versions for MacOs and Windows are ready. In the future, we will create versions for mobile devices and Linux.

Platform functional:

- 1) Creation of indices crypto-currency.
- 2) Sell your indexes and earnings on this.
- 3) Multi-currency wallet.
- 4) Simple creation of tokens based on **AliensCoin** (Analog ERC20 Ethereum).
- 5) Cryptocurrency exchange (Centralized, then decentralized exchange).
- 6) Transactions between users with a very small commission and fast execution speed.
- 7) Buying indices of managers.
- 8) Purchase of cloud hashrate.
- 9) API for accepting payments in **AliensCoin** and other coins.

AliensCoin plans.

01.06.2018

START ICO

01.11.2018

END ICO

4Q 2018

- Launch a full-fledged exchange and add more than 100 currency for trading and deposits.
- Right after the end of the ICO, within a month the trades on AlienCloud will be started.
- Start mining pool for BTC and ETH pooling without commissions.
- Start-up of mobile wallets AlienWallet.
- Add AliensCoin on other exchanges.

1Q 2019

- Launch AlienNetwork for transactions between system users without commissions.

2Q 2019

- Activation of the decentralization mode for all desktop and mobile platform wallets.

3Q 2019

- Launch of a decentralized exchange.
- API for receiving payments in AliensCoin and other coins.

The number of coins is fixed - 50 million pieces of **AliensCoin**. Each coin according to the **AliensCoin** wallet standard has 8 decimal digits (X, YYYYYYYY).

FULL AMOUNT OF COINS

 50 000 000 ALS

Coins are produced and sold on the ICO and Pre-ICO. All not sold coins are "burned" and removed from the network.

1 000 000 ALS

Sale at Pre-ICO

49 000 000 ALS

Sale at ICO

We sell **AliensCoin (ALS)** at ICO.

After the finishing of the ICO, it is possible to buy a coin only from other P2P users or through a stock exchange. Firstly, the auctions will be launched on our website AlienCloud. In case of good liquidity, trades will be held on other popular exchanges.

The coin is needed to use the platform. But this is not its main functional. Also **AliensCoin** can be freely used in calculations between users.

To protect against DDOS attacks, a system of transfer fees will be introduced. The commission is floating, depending on the network loads.

PLANNED AVERAGE COMMISSION FOR TRANSACTION

0,00001 ALS

The AliensCoin cryptocurrency will not be mined and will function independently on the principle of an open decentralized payment system.

To protect against spam and DDOS attacks, the creating of Indices and Tokens involves making a reserve deposit in **AliensCoin**.

Minimum deposit for creating a token: **750 ALS**

The minimum deposit for creating the index: **200 ALS**

The minimum deposit for the sale of the index: **750 ALS**

The reserve deposit for the creation of the cryptocurrency and Token indexes is refundable. The deposit can be returned in case of closing the transaction (voluntary removal by the user of its Index or Token).

Alienscoin is part and fuel for our system. All our services are planned to work as a one system. **AliensCoin** wallets are planned to be used on the basis of AlienWallet and AlienCloud.

AlienCloud

AlienPool

AlienPay

AlienWallet

ALIENSCOIN

AlienCloud

Cloud hashing platform and cryptocurrency exchange.

AlienWallet

A desktop wallet, integration with AlienCloud.

AlienPay

API payment solution for stores.

AlienPool

Mining pool without commissions.

The screenshot displays the AlienCloud Wallet interface. On the left is a purple sidebar with navigation options: Wallets, AlienCloud Accounts, Send, History, Address book, and Settings. The main area is titled 'ACCOUNT LIST' and shows a grid of account cards. Each card displays a balance in ETH and USD, along with a hexadecimal address. The top card shows a balance of 0.00000000 ETH (0.00 \$) with address c654dba247b27daa094e5c3e43e4ae30c0b28b1e. The second card shows 0.02163000 ETH (12.81 \$) with address 1a887bfb4b3ae8abcadb6f4819fdf969c25b0007. The third card is labeled 'Main Acc' with a balance of 0.05716692 ETH (33.85 \$) and address 1bf6a356ee9288e1d49e053dbcbb8c716dc238b. The fourth card is labeled 'Oplata 4' with a balance of 0.71170000 ETH (421.35 \$) and address edcaf3b6385cccc414f37856fea720ffe75cc0f7. The fifth card is labeled 'Oplata.3' with a balance of 0.00000000 ETH (0.00 \$) and address f4434bbd28b1dd569b64ebc2b77c676658efe324. The sixth card is labeled 'Oplata3real' with a balance of 0.00443580 ETH (2.63 \$) and address 460a3d954c73cd9526e6ed8c78b8148c8fba0984. At the top left of the main area, it says 'TOTAL BALANCE 470.63 \$'. At the bottom left, it says 'ETH/USD 592.04 \$' and 'Alien Wallet v1.4.2 Data updated: 02.06.2018 20:45'. The top right of the main area has filters for 'All', 'ETH', 'ETC', 'Blocks', and 'List'.

AlienWallet

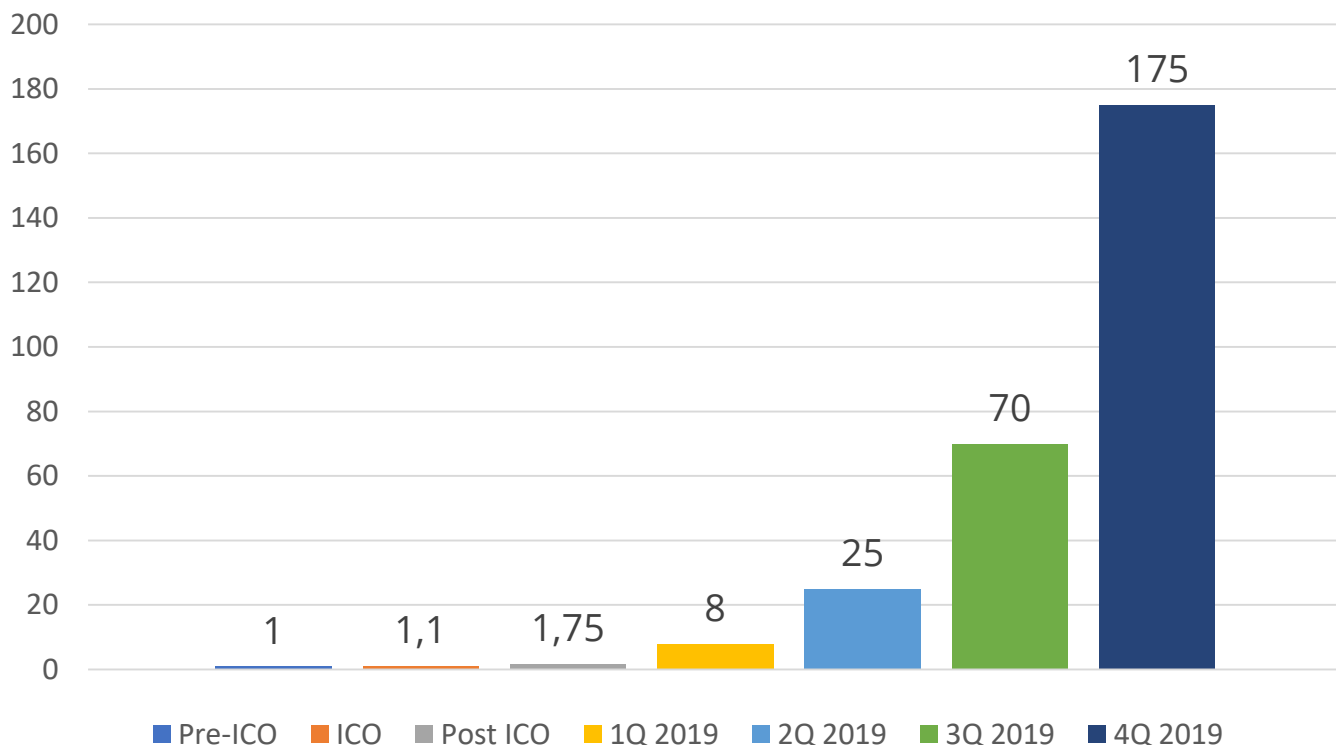

Convenient, fast and safe way of cold storage of ETH and ETC. Recently integration with AlienCloud has been added. AlienWallet work on Windows, MacOS.

In the future, mobile and Linux versions will be added.

wallet.aliencloud.xyz

ALS/USD price plan (x times)

The estimated cost is approximate, based on the planned growth rates of the number of platform users and our development plans. We do not guarantee that you will receive an income and we inform you that the purchase of **AliensCoin** has risks. But we plan to reach and exceed this schedule, for this we will successfully go on our road map. In the case of a successful ICO and the growth of the company AliensCoin tokens will bring after ICO more than 7000% of annual profit.

2Q 2017

- Launching of the first public mining farm
- Beginning development AlienCloud Website.
- The basis of the team was assembled

3Q 2017

- Website Release www.aliencloud.xyz
- Launching alfa-test mining pool ETH and BTC.
- Adding "Index Market" functional to website

4Q 2017

- Increasing the amount of team members to 15 people.
- Support of 18 crypto-currencies on the website.
- Generation and protection of wallets was improved.
- Support of 9 mining-currencies (added ETC+BCH+BTG).
- Improved referral system up to 7 levels.
- CAPTCHA added.
- Contract for new space for mining with an area of 1000 sq.m. and a power of 1000 kW was concluded .
- Developing of AliensCoin.
- The number of users of the website has exceeded 4500.

Now we have switched to the public, all active development you can see in the section Road map on the website www.aliencloud.xyz.

ICO goals

At ICO we release **49 000 000 AliensCoin** for the price of **0.1\$**.
Received funds we will spend for:

- 1) Updating of the centralized online **AliensCoin** system.
- 2) Start of trading **AliensCoin** на AlienCloud. Adding wallets of all major crypto-currencies to the system.
- 3) Launch of **AlienNetwork**.
- 4) Launch of mobile centralized wallets Android и iOS.
- 5) Finalization **AlienWallet** for Windows, Linux, MacOS.
- 6) Activating the decentralization mode for all local and mobile platform wallets.
- 7) Launch of a decentralized exchange.
- 8) Increase value of company and **AliensCoin**.
- 9) Increasing of amount platform users.
